Per quale motivo ubuntu non mi vede piÃ¹ i driver proprietari mentre con mint Ã¨ tutto ok?

Ubuntu:

<http://i.imgur.com/7Dw3h.png>

Mint

in pratica dovrei vedere una cosa del genere:

<http://i.imgur.com/B6nB8.png>

e invece non mi presenta alcun driver da installare

un motivo puo' essere che hai aggiornato il kernel di ubuntu e quindi
devi riscaricare il driver e riabilitarlo

sia mint che ubuntu hanno lo stesso kernel aggiornato ma con mint, come
vedi Ã" tutto a posto

> hai per caso sotto mano il link che controllo...

Per controllare, esegui:

```
$ cat /etc/apt/sources.list | grep -v ^# | grep restricted
```

Io, per esempio, ho:

```
lem@biggy:~$ cat /etc/apt/sources.list | grep -v ^# | grep restricted
deb http://archive.ubuntu.com/ubuntu lucid main restricted
deb-src http://archive.ubuntu.com/ubuntu lucid main restricted
deb http://archive.ubuntu.com/ubuntu lucid-updates main restricted
deb-src http://archive.ubuntu.com/ubuntu lucid-updates main restricted
deb http://archive.ubuntu.com/ubuntu lucid-backports main restricted universe multiverse
deb http://archive.ubuntu.com/ubuntu lucid-security main restricted
deb-src http://archive.ubuntu.com/ubuntu lucid-security main restricted
```

Ora prova:

```
$ apt-cache showpkg fglrx
```

Naturalmente, se scopri di non aver installato apt-cache, installalo.
